

Anne Raymond
National Breeder Services Manager

Anne Raymond is our National Breeder Services Manager and is available to help with any feline query - from how to go about getting the purrfect breed for you to helping cat exhibitors gain that all-important winning edge with their advice on feline health and nutrition.

Anne Raymond has many valuable years of experience as a Breeder and has been part of Mars Petcare Australia since 1996. Anne lives with her husband Garth & daughter Kate on 10 acres near Gawler (the gateway to the Barossa Valley) in South Australia. Four cats, German Shorthaired Pointers, A Doberman and many horses make up the remainder of the four-footed component of the household.

Anne's favourite cat is four-year old Scottish Shorthair named Hamish, whose quirky character and adventures keep everyone amused. The other felines are Simba who came from the Animal Welfare league, Rex, a very large and friendly Chinchilla Cross and Hamish's brother Angus.

The group of Raymond 'cougars' have the job of guarding the dog free zone in the courtyard from any mice that may try to venture inside and staring loftily from the pergola down at the dogs.
